Description

Screenprint
Print technology for which the printing plate is a template.
Onto this template a close meshed fabric is put and through this fabric the colour is transferred onto the print area of the bauble.

What is possible:
• Simple logos or text
• Only 1-colour
• Around-the-bauble printing possible
• 3D print, which means that the print is highlighted with glitter

Padprint
A silicone pad takes the motive from a low pressure printing plate and “print” it on the bauble
(like a stamp). Because of rapid drying of the colours it is possible to print up to 5 colours consecutively and on top of each colour.

What is possible:
• High precision of the print
• Simple logos text up to detailed pictures one-coloured or 4-5 coloured.
• Printing only possible at one side of the bauble and/or at two sides
