For a natural and eco friendly style, the Wooden Card USB boasts a slim and convenient design that can make any company display a professional look. The Wooden Card has the ability for either laser engraving or to have a full colour print on both sides to represent your company’s logo in the best way possible. The Wooden Card has an easy ‘pull and rotate’ mechanism to expose the USB Flash and it stores away nicely so the flash will not get damaged. This also allows for the whole of the surface area to be printed or engraved – perfect if your company logo is large and detailed. As with all of our USB Drives, the data size ranges from 64Mb up to 64Gb allowing you to tailor the space as needed. We provide up to 400Mb of data upload free of charge with all orders with the options for data locking, an auto run feature or volume labeling. The Wooden Card has a minimum order of just 50 units and is available on our 10 working days delivery service worldwide.
